Installation of a Garage Door Opener (G.D.O.)

Installation of a G.D.O. requires the top of the door to be properly reinforced the full width. Hörmann recommends a professional installing dealer for your G.D.O. needs. Any G.D.O. not installed by a professional garage door installation company voids this warranty. Garage door openers, when not installed correctly can cause injury or death. Check the G.D.O. owner's manual for proper installation and adjustments. Monitor these adjustments monthly. Damage to your door by a G.D.O. is not a factory defect and not covered under this warranty.

Maintenance

Periodic cleaning and inspection of the product must be performed in order to sustain the product warranty. Any issues discovered upon inspection should be addressed immediately. To best protect the product, the *Steel Door Cleaning and Finishing Guidelines* (G-13) should be followed. Refinishing a door that has exposed bare metal surfaces due to damage, corrosion, or exposure is considered necessary and part of proper maintenance. If mechanical issues are detected, Hörmann Group North America recommends that only an EXPERIENCED DOOR TECHNICIAN such as your Hörmann Dealer make adjustments to your door. **Serious injury can result from improper adjustments to the product.**
